

## Halloween cupcake machine embroidery designs – how to use?

You can use Halloween cupcake machine embroidery designs in different ways.

Let's give an example on the design of the machine embroidery cupcake Owl.

The first. You can embroider it just on the fabric.

The second. Making a patch.

Third. You can make a ring for serving napkins.

We provide the design in three sizes. Also we include the design of the napkin ring in the set. This ring is made with the using of the FSL technique (free standing lace). This means that you need to embroider it on a water-soluble stabilizer. After you have finished embroidering, remove the stabilizer and dissolve the embroidery in water. Dry, iron if necessary. The ring is ready.

## Use Halloween cupcake machine embroidery designs for the patches

You will need:

- ~ Fabric for patches. If you do not have it, you can use felt.
- ~ Cut-away or tear-away stabilizer.
- ~ Temporary spray adhesive.
- ~ Heat-away film for patches. It allows you to iron a patch to the fabric without sewing.

## Halloween cupcake machine embroidery designs – how to use?

1. Hoop the fabric for patches. Then use a temporary spray adhesive to glue the tear-away or cut-away stabilizer on the wrong size.

2. Embroider the design
3. Delete the excess stabilizer.
4. Cut the embroidery design retreating 1/9 – 1/12 Inches.

## Heat-away film for patches. How to attach the patch using it?

1. Cut a piece of heat-away film according to the size of your stripe or you can cut a bit bigger cloth. Take a good look at this film. It's one side is shine, and the other is matte. Apply the heat-away film with the shine side to the wrong side of the patches.

## Halloween cupcake machine embroidery designs – how to use?

2. It is best to put a patch with a heat-away film on some backing: the wrong side of the bottom and then the film with the matte side up.
3. Heat the iron to the maximum temperature and begin to iron. Pay a special attention to corners. Do not be afraid to press hard on the iron for better handling. After about a minute heat-away film will stick to patch.

4. Cut off any excess film protruding from the edges of the patch. Do it very accurately. The finish result depends on this process.
5. Now you can glue the patch to the product. Remove the protective layer of paper. It allows not stick the patch to the iron. Put the patch on the right place where you want to stick it. Carefully iron the patch. In a minute it will stick to the right place.

**IMPORTANT:** Depending on the type of fabric of your product, adjust the temperature of the iron. In no case do not attempt to glue the patch to silk or wool at the maximum temperature.

## Halloween cupcake machine embroidery designs – napkin ring

Also, this design can be used to make a ring for serving napkin. Use all the previous steps, except for gluing the patch to the product.

After trimming excess heat-away film, the patch should be glued with the same piece of fabric, on which you embroidered it. This must be done for a beautiful inside.

## Halloween cupcake machine embroidery designs – how to use?

1. Remove the protective paper on the patch. You will see the adhesive layer.

2. Put the patch on the piece of fabric with the adhesive side and iron it properly.

3. When the wrong side is glued, carefully cut off the excess fabric along the contour of the cake.
4. Now you need to make a ring on a napkin and sew a ready-made cake to it.
5. The ring can be made of felt.

Halloween cupcake machine embroidery designs will help you to decorate the festive interior in a short time.
